P5

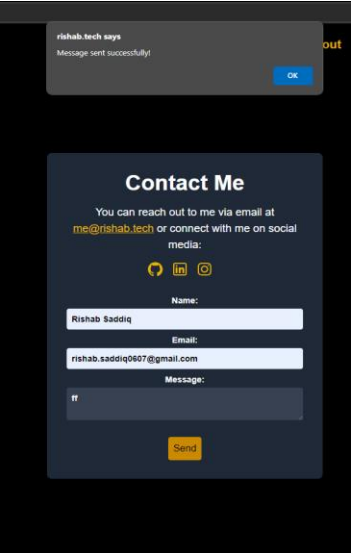

Test the portfolio for purpose and functionality on a different system and browser and take appropriate action.

This portfolio has undergone extensive testing to ensure it functions as expected across all platforms. From desktop to mobile, every feature has been meticulously checked and verified to guarantee a seamless user experience, confirming that all elements work flawlessly on any device.

Commented [AG4]: P5 Has not been achieved yet. You aslo need need to test that the portfolio opens in 3 browsers of your choice.

1	Navbar Functions	Click on every item and check if they direct to each page as intended	Works as intended, directs to each page	
2	Button functions	Check the following works , assignment buttons , project button (home) and send button (contact page)	Assignment buttons work as they send the user to the correct page, the project button on the home page works	

Name:

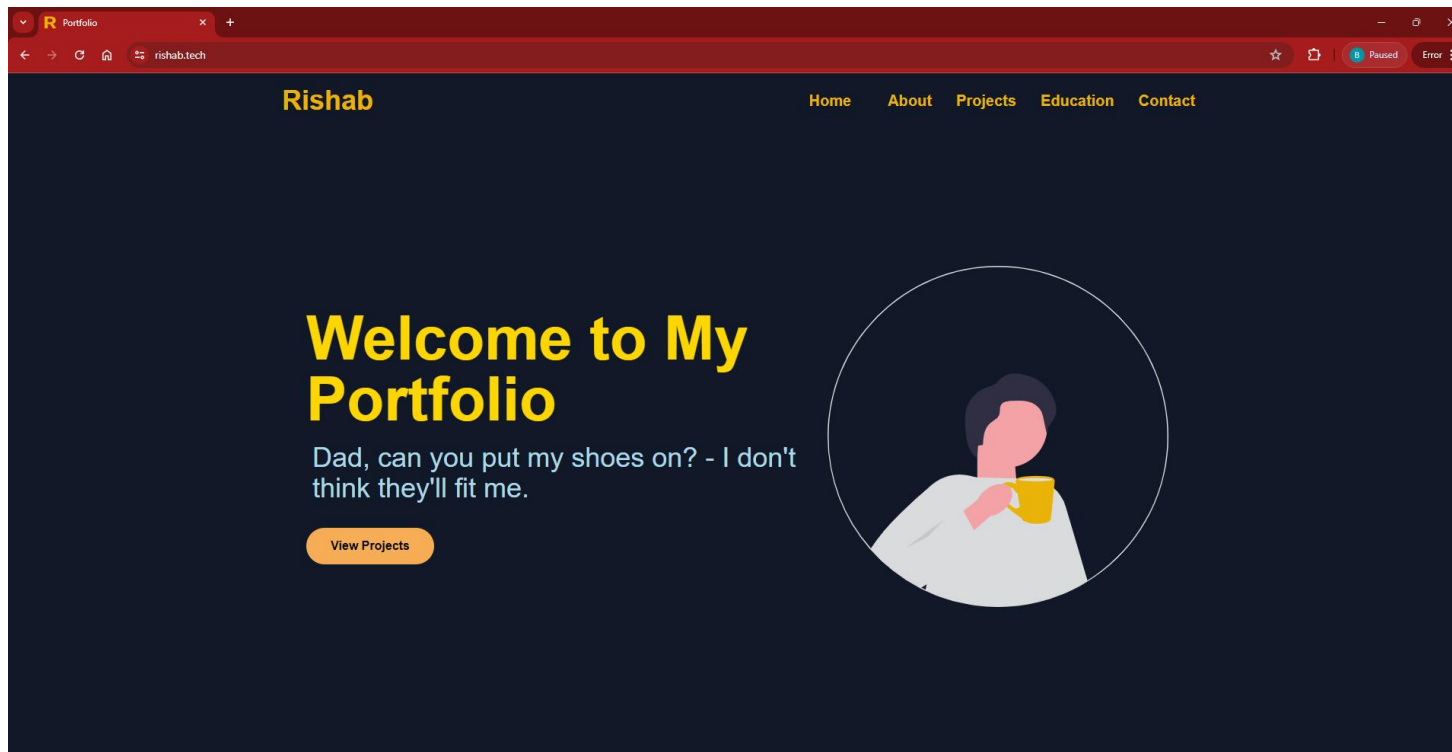

3	Contact form	The contact form should send a message when an email is sent, it should be able to check for errors before submitting the form	The contact form works as intended , the contact form prompts the user if the info entered is incorrect			
---	--------------	--	---	--	--	--

Name:

4	Download buttons	Assignment download buttons allow for the user to view the assignment in pdf form	The download buttons work as intended , they direct the user to the correct assignment	<div><div>Assignment 1</div><div>Click the link below to download.</div><div>Download Link 1</div></div> <div><div>https://rehab.tech/static/media/Unit%209%20Assignment%201_Ruh%20t185d5f705d23c180.pdf</div><div>Draw</div><div>Read about</div><div>Ask Copilot</div><div>1 of 18</div><div>Name:</div><div>Contents</div><div>Assignment 1 – Uses and Features of Spreadsheet Software Packages..... 2</div><div>Introduction 2</div><div>Pass 3</div><div>Purposes of Spreadsheet 1: 3</div><div>Tools and techniques 4</div><div>Merit..... Unit 3 (No pdf downloads , yet to be added)

Unit 9

Unit 12

Unit 14

Name:

M3

Develop the portfolio using, demonstrating awareness of audience:

1. A range of suitable assets on the web pages
2. Consistent navigation, demonstrating commentaries to explain the content.

All done, refer to the link [Portfolio \(rishab.tech\)](https://rishab.tech)

The portfolio created in Module 3 consists of a total of 11 pages. Out of these, 6 pages are dedicated to assignments, while the remaining 5 pages include:

- **Home**
- **About**
- **Projects**
- **Education**
- **Contact**

I have added jokes to the home page to show my personality and adds funniness to the website

Commented [AG6]: M3 Has not been achieved yet .You need to describe with screenshots what additional features you have added to the portfolio to enhance the usability and improve the user experience

Name:

Welcome to My Portfolio

Why do chicken coops only have two doors? - Because if they had four, they would be chicken sedans

To enhance the visual appeal, the same set of images is used across different pages, adding a lively touch to the overall design. The website is designed with user-friendly navigation, making it easy for users to browse through different sections. Each unit within the projects page contains detailed content explaining the topics and concepts covered during the respective unit.

M4

Gather feedback from others and use it to improve the portfolio, demonstrating awareness of audience and purpose.

Commented [AG7]: M4 Has not been achieved yet .As you have not demonstrated enough evidence of improving the portfolio based on the user feedback.

Time to complete

🗨

...

1. What do you think of the website? *

Score

/ 0 pts

🗨

its good, not much content or colour variety but it works

2. What needs changing e.g. color ? *

Score

/ 0 pts

🗨

bit more colour, yellow and black are a bit boring

3. Was it easy to navigate through ? *

Score

/ 0 pts

🗨

yeah

4. Any changes you would recommend for me? *

Score

/ 0 pts

🗨

more. colour. (also fix the border going out of frame on the home page pls ty)

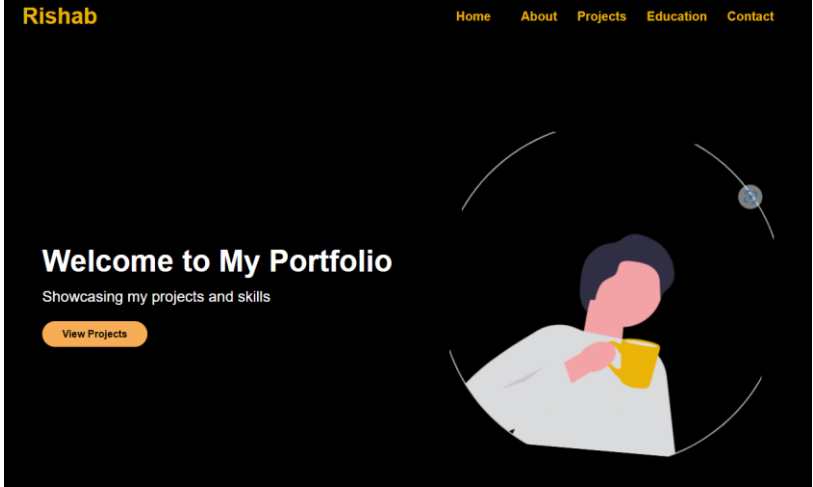

This feedback consisted of the following

1. Content
2. Colour choices
3. Animations

I have taken into account the feedback , and have done the following

1. Colour
2. Animations

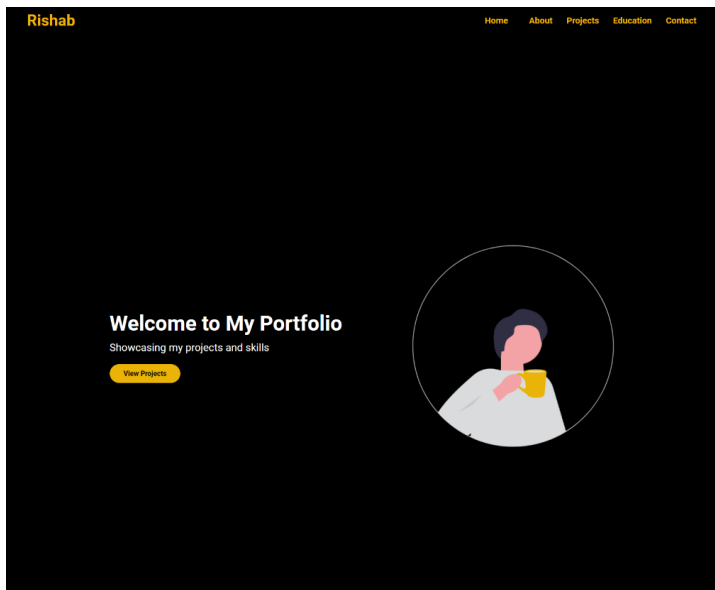

This animation was removed as per the feedback

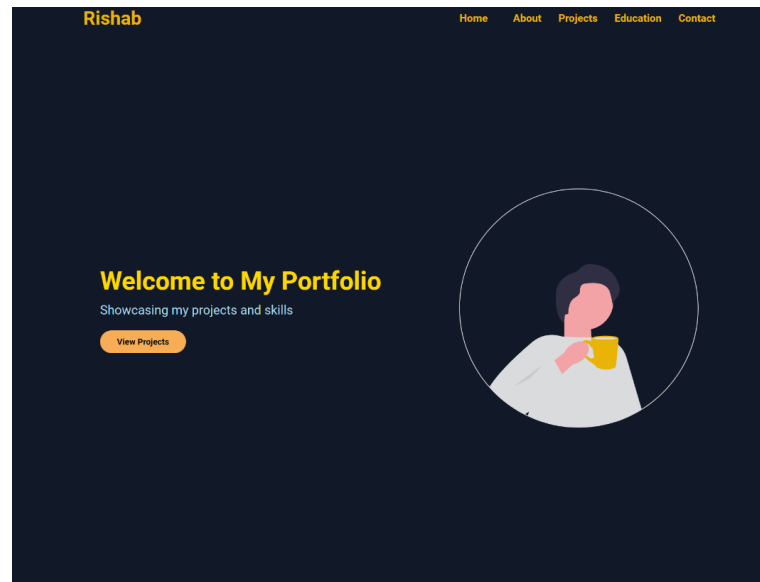

Commented [AG8]: What do you mean by animation here? have you added any amination to the portfolio? you need to show evidence and describe exactly where you have included the animation .

Name:

Before changes

After changes

Colour was changed as the website was too black, there was a hover effect which I have removed from the image, I have added colour to the Hero text and changed the colour of the view projects button. This therefore helps with the user experience as there is more colour added which makes the website look more professional.

The website

Unfortunately, I had the user do a review on the new design and the review shows that the website design and its elements are up to scratch and nothing else is wrong.

Name:

Distinction

D2

Justify the choices made in your design solution explaining how the digital portfolio will:

1. Fulfil the stated purpose.
- **Work Display:** The portfolio is structured to present my work in an organized and reader-friendly format. This clarity ensures that visitors can appreciate the quality and breadth of my projects without any distractions.
 - **Interactivity:** By enabling interaction with the portfolio, users can engage more deeply with the content, whether it's through viewing details, leaving feedback, or sharing pieces they find compelling.
 - **Personalization:** The site is uniquely mine, from the visual design to the content. It's a digital representation of my professional identity, crafted to stand out in the digital landscape.
 - **Historical Insight:** The inclusion of my employment and work history offers a comprehensive view of my professional evolution, providing context and depth to the showcased work.
 - **Custom Domain:** A custom domain name not only lends credibility but also makes it significantly easier for users to remember and revisit the site.
 - **Content Organization:** The thoughtful division of content into distinct sections ensures that information is not overwhelming and is easy to navigate, leading to a more enjoyable user experience.

Each element of the website has been carefully considered to ensure that it serves a specific purpose, contributing to a cohesive and effective online portfolio.

Commented [AG9]: D2 Has not been achieved yet. You need to discuss in detail and review the different features your portfolio has and how those features do enhance the user experience

Name:

2. Meet the needs of the audience.

- **User Navigation:** The website's architecture is constructed with the user's journey in mind. A clear and intuitive navigation system ensures that visitors can move through the site with ease, finding information quickly and without hassle.
- **Content and Animations:** The strategic use of engaging content and animations serves to captivate the audience's attention. These elements are not just decorative; they're functional, guiding users through the site and highlighting key sections.
- **Target Audience:** The design considers the needs of a specific audience, such as hiring managers and employers. The site's ease of navigation allows these professionals to efficiently discover relevant information, showcasing my skills and experience in the best light.
- **Contact Form:** A prominent contact form is readily available for users who wish to connect. This feature is essential for networking, as it provides a direct line of communication to me, whether for job opportunities, collaborations, or inquiries.
- **Professional Appeal:** The website maintains a professional tone while also reflecting my personality. This balance is crucial in creating a memorable online presence that resonates with visitors.
- **Custom Domain:** The use of a custom domain enhances the site's credibility and memorability, making it easier for users to return or refer others to the site.
- **Content Organization:** Information is thoughtfully segmented and presented in a way that makes reading effortless. This organization is key to retaining user interest and ensuring they can find what they're looking for without feeling overwhelmed.

In summary, the website is meticulously crafted to not only meet but exceed user expectations, providing a comprehensive, engaging, and accessible digital portfolio.
